

“I need a safe that has the flexibility to grow with my business.”

COMPUSAFE® RENAISSANCE SERIES

The rebirth of the smart safe

The new Brink's CompuSafe® Renaissance Series was designed with you in mind. Based on feedback from thousands of CompuSafe users, we are proud to introduce CompuSafe® Galileo – the first modular smart safe designed to grow with your business. Since Brink's introduced our first smart safe more than 15 years ago, we have continuously used new technology to automate the cash-handling process, aggregate deposit information and make it available across your organization.

MODULAR BY DESIGN

Perfect for busy, cash-intensive locations, the compact CompuSafe® Galileo two-door safe easily fits under-the-counter or in the back-office. The optional features – including additional storage and bulk note acceptors – make this the only safe you'll ever need to securely manage your cash flow.

CUSTOMIZED BY YOU

With CompuSafe® Galileo you no longer need additional safes to store cash drawers and change funds. The optional features allow you to create a safe designed for your business. In addition to the large storage area at the bottom of the safe, Galileo also has an optional side storage compartment that can be added at the time of manufacture – or later as your business needs change. To help save time, you can also choose bulk note acceptors, which can each accommodate 30 bills at one time.

A BETTER WAY TO MANAGE CASH HANDLING

Increase productivity – Free staff from performing time-intensive, non-core operating tasks such as counting cash, researching discrepancies and preparing deposits.

Improve loss prevention – Brink's controls the entire cash management process, virtually eliminating exposure to internal and external theft.

Consolidate currency – We can help you consolidate deposits to a single account, saving you the time and expense of managing multiple banking relationships.

Get greater visibility – Enhanced reporting provides immediate verification of deposits, helping you audit cash activity by store, shift or cashier.

Reduce capital expenditures – With Brink's CompuSafe® Service, there is no equipment to buy and maintenance is included, saving you costs.

Receive accelerated credit – With Daily CreditSM you receive credit from select financial institutions for cash receipts before the cash actually reaches the bank.

CompuSafe® Galileo Specifications

- Height: 29.25"
- Width: 13.75"
